

Heartwave

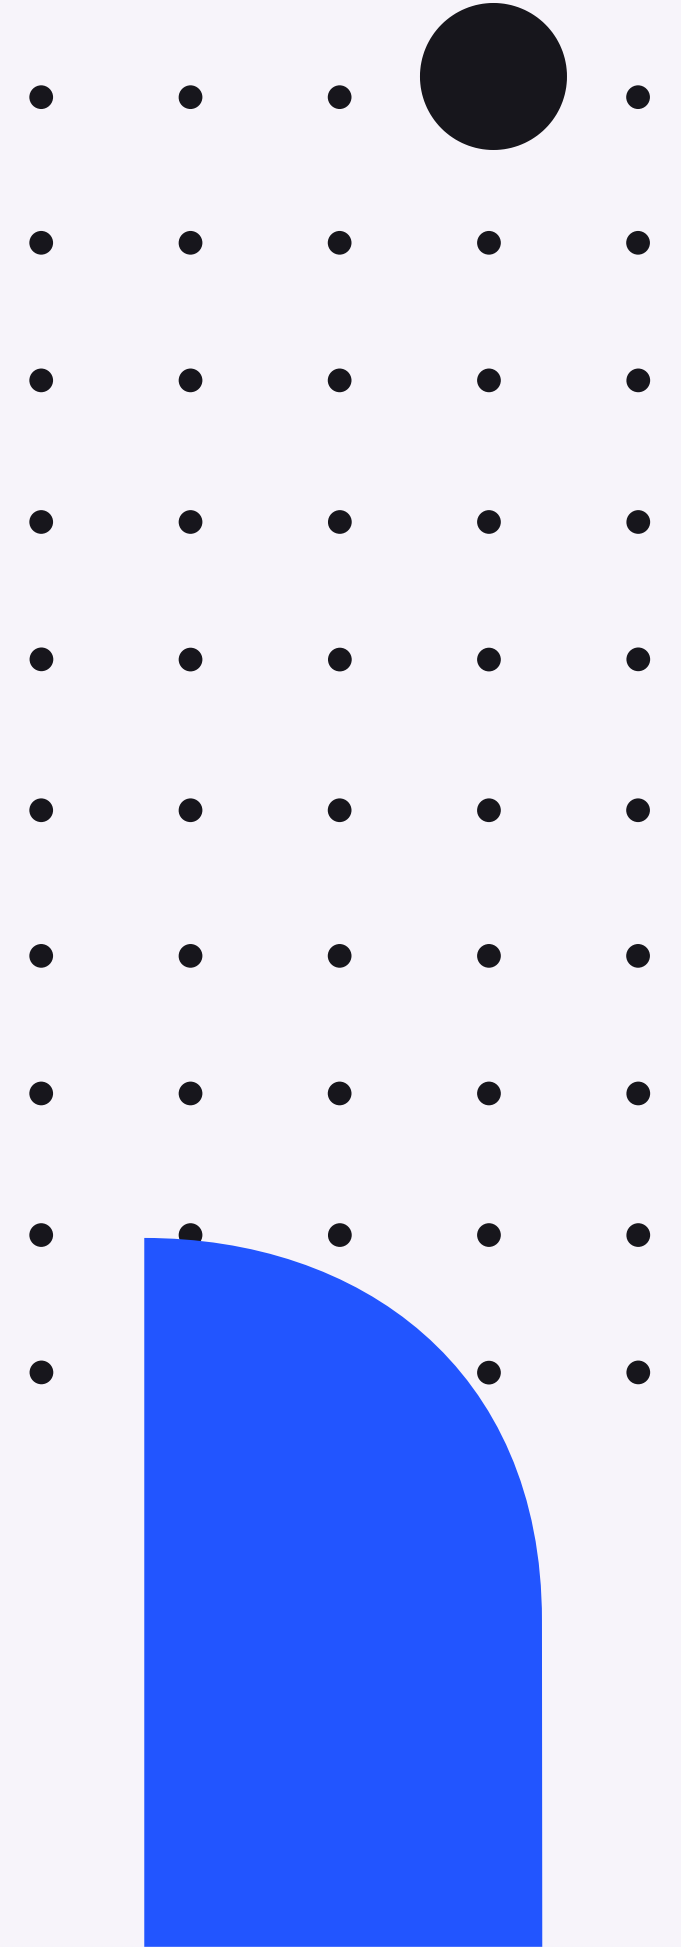

<itc> Hackathon 2021

Problem

Cardiac disease is the #1 cause of death globally.

Hospitals are **overflowing**.

Heartbeat irregularities are a **silent** killer.

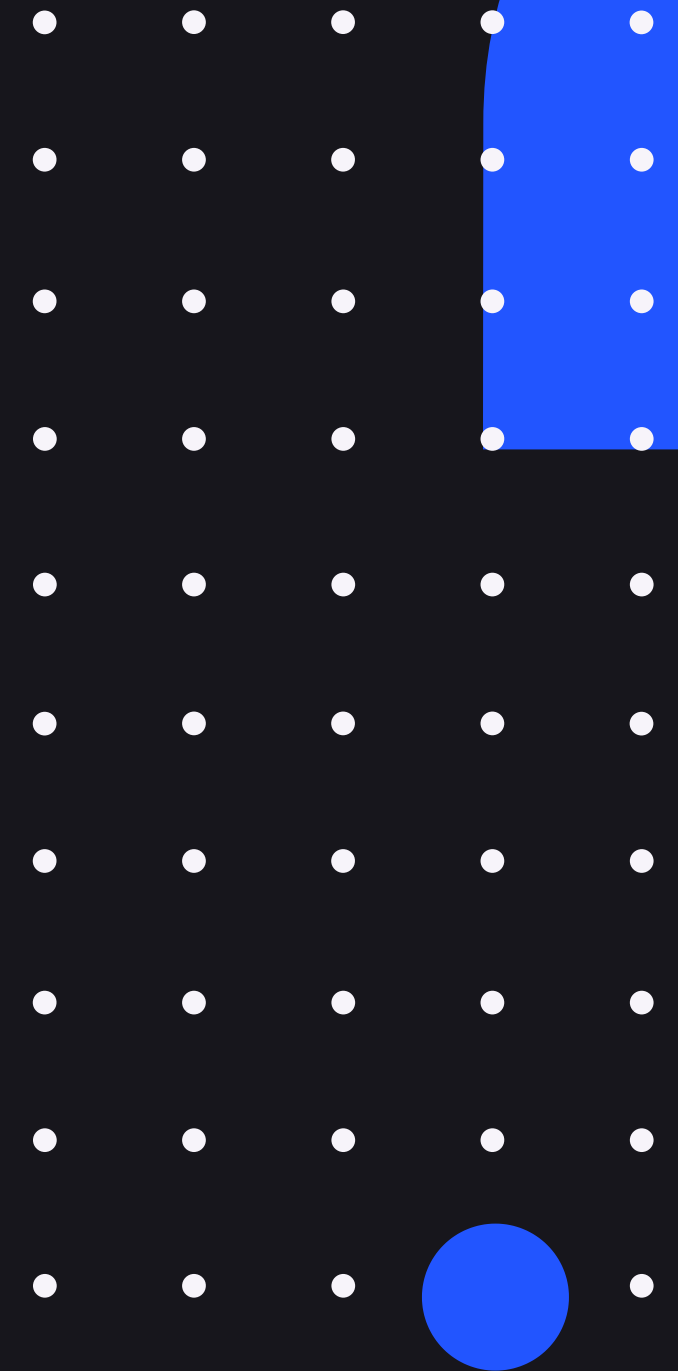

Our Approach

Patient's **wellbeing** at the centre of our platform.

Detect heart arrhythmias **instantly**.

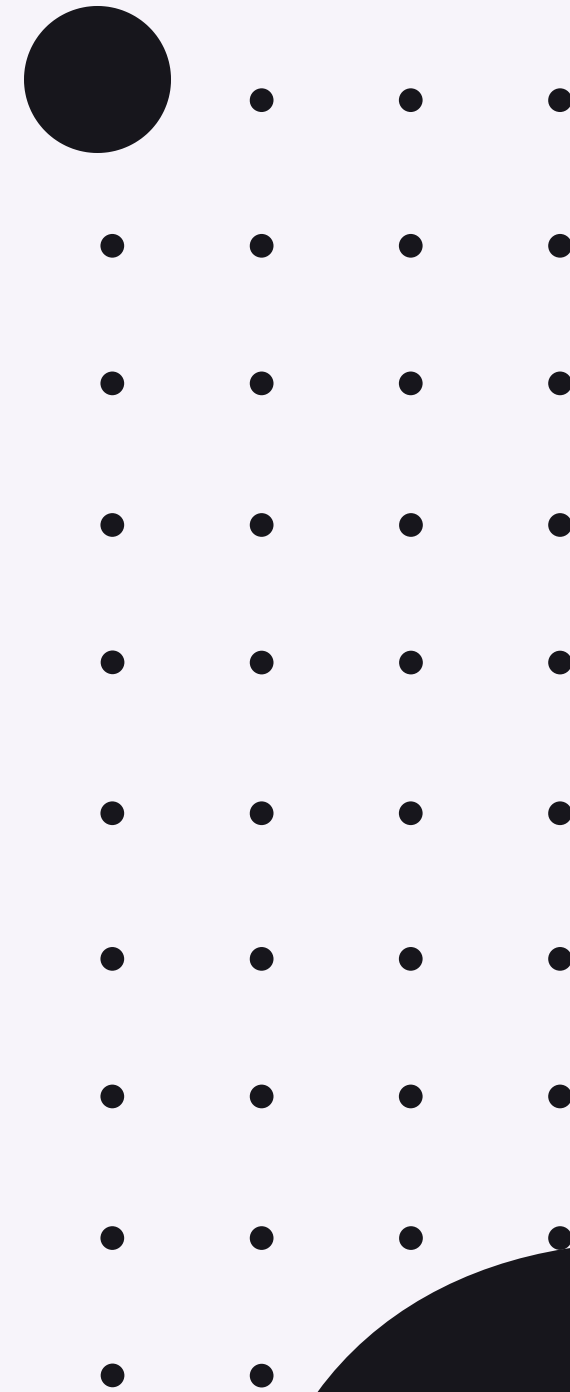

Deliver easy to understand **insights**.

Empowering the patient.

Lowering costs for hospitals & patients.

Prioritizing patients in need of critical intervention.

**The
Impact**

Heart Arrhythmia

- **Condition where the heartbeat is irregular.**
- **Can cause stroke, heart failures or cardiac arrest.**
- **12% of all global deaths are caused by ventricular arrhythmias.**

The Market

Remote medicine is becoming
widespread.

ECG sensors are cheaper and
more common.

\$111.4 Billion

Valuation of the Global Digital Health Market in 2019.
